

MESSAGE FROM THE CHAIRPERSONS

On behalf of the WISP'2011 Organizing Committee, it is our pleasure to welcome you to the *7th IEEE International Symposium on Intelligent Signal Processing* and to Malta, this beautiful historic island in the Mediterranean Sea.

The 7th IEEE International Symposium on Intelligent Signal Processing will take place in Floriana, part of the enchanting capital of Malta, Valletta, a venue chosen to enhance interaction between participants as well as to give the event an appropriate setting. As a tradition, WISP'2011 is planned to offer a possibility for scientific communities working in the fields of intelligent systems and signal processing to exchange ideas and experiences. WISP 2011 aims to bring together scientists, researchers, and engineers to present the state-of-the-art of both sides, to understand each others counteractions, to impress each other, and to result in new theoretical and practical achievements and innovations related to intelligent signal processing in complex, distributed, embedded, and real-time systems.

As recognition of the symposium, the *IEEE Transactions on Instrumentation and Measurement* intends to promote the best results presented at WISP'2011. All published papers, fitting into the focus of IEEE TIM can be submitted to TIM via a special submission procedure. However, the manuscripts must be significantly extended beyond the scope of the proceedings papers.

The venue of the symposium, Floriana, Valletta, Malta is a unique place where so much of the historic past is visible today – from the 5000 years old temples to the immense fortifications and palaces built by the Knights of St. John in the middle ages. There is much to discover: the magnificent fortified town, the busy street of the Knights, the glorious harbour, and not at least the sandy beaches and sunny landscape itself.

We would like to express our deep appreciation to the International Scientific Program Committee Members for offering their time in reviewing the submitted papers in such a short space of time. We would like to thank to the Conference Secretariat and to the Local Organizers for their efforts in the preparation of the event. Our pleasant duty is to gratefully acknowledge the support provided by the sponsors of the conference: the *IEEE Instrumentation and Measurement Society* and the *IEEE Hungary Section*.

Finally, we wish to thank to the plenary speakers of the symposium, to Professors Dong Hwa Kim and Toshio Fukuda for accepting our invitation and to you for coming to WISP'2011 – the success of the symposium depends on your contributions. We wish you a pleasant stay in Malta and we hope that you will enjoy the symposium and the enchanting island and capital of Malta, Valletta.
